For any further clarity on the Branding guidelines please write to [corpcom@indoco.com](mailto:corpcom@indoco.com).

#### PRIMARY PALETTE:

#### SECONDARY PALETTE:

#### PRIMARY PALETTE:

- The primary palette includes Brand Blue (hero)
- Each colour includes nine tints and that should be used on digital and print assets.

#### SECONDARY PALETTE:

- The secondary palette includes Blue & Navy Blue
- This palette should be reserved and used only when additional colours are needed

#### NEUTRAL PALETTE:

- Dark to light neutral palette mostly for use in text and icon purpose
- Colour selection is minimal and works in harmony across the entire design

Note: RGB colors used only in digital communications and applications

#### NEUTRAL PALETTE

## FONT

Use Open Sans on all digital and print communications. Open Sans is a Google Font which can be downloaded directly from the site. All headlines across digital and print should be set in extra bold weights of the brand typefaces

For optimum legibility, the type-point size should always be set consistently to the leading and works best when the leading is 4 pts. larger than the copy

Use correct font weights for headline and body copy, creating visual and ordered balance

# OPEN SANS

**Extra BOLD** ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**BOLD** ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Semi Bold** ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Regular** ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

**Light** ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

## *Courgette Regular*

*Regular* ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890

Use Courgette Regular for all headlines,  
and in special titles (Indoco)

## ICONOGRAPHY

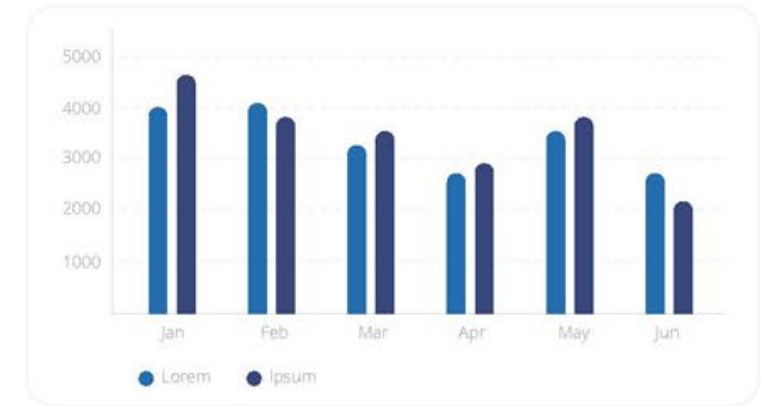

- Infographics utilize bold, contrasting colours to highlight areas of importance/focus
- When building information graphics, use the primary palette as much as possible
- Secondary colors can also be used if there is always at least one primary color present
- All icons should be minimal and composed of a single-width rule line
- Icons should be set mostly in neutral palette

## 34 X 34 PIXEL GRID

The 34 x 34 grid structure is the foundation for our iconography system.

The stroke weight of each icon is equal to 1 dp.

### logo (primary-use)

It is important that the surrounding space around the indoco logo remains free from other textures, text, and imagery in order to ensure legibility. The clear space for the horizontal logo is defined as the height of the circle and is denoted by the blue lines as shown to the right.

Primarily, the horizontal logo should be placed flush left in the upper or lower corners of the page and aligned with the margins. In some instances, the logo can be placed flush right or center aligned to the lower area of the page depending on the design needs and layout.

When sizing the logo for use on a standard letter-sized or A4 page, the height of the symbol should be equal to approximately 1/15 of the page height.

The minimum size for maximum legibility and reproduction of the horizontal logo is 1 inch wide.

### Clear space

### Sizing

### Minimum Size

0.75" inch

96 px

19.05 mm

### Preferred Placement

### Secondary Placement

### Indoco endorser brand: digital application

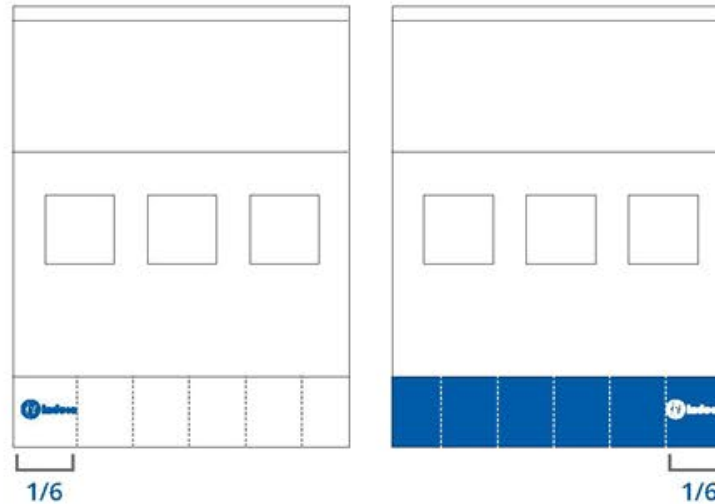

Due to the responsive nature and varying designs of product websites, the Viatris logo can be used in lieu of the Viatris endorser mark. This will allow the logo to shift positions as needed between desktop and mobile views.

The recommended placement of the Viatris logo is flush left or right in the footer area of all product websites. It is recommended that the full-color logo be used where possible on light colored backgrounds. When the full-color logo cannot be used the reversed (solid white) logo can be used as a secondary option.

Due to some size limitations with digital banner ads, it is also recommended that the Viatris logo be used when the endorser mark must scale smaller than the minimum size in order to fit within the layout. In this case, the Viatris logo should be placed on a light-colored background near the bottom right of creative (see 728 x 90 example).

A white Viatris logo may be used as an alternative design option to better align with the product artwork, if needed. All guidance associated with proper application of the logo should be followed.

### Logo placement: web site

### Logo placement: digital banners

\*For extremely small banners (e.g. 320 x 50px or 300 x 50px) the endorsement of the master brand can be removed if it infringes on the product messaging.

### LOGO AND COLOR FORMATS

- The Indoco logo is comprised of the symbol and the logotype
- The primary full-color horizontal logo should be used whenever possible
- In special instances, logotype and bottom line may be used on their own.
- It is very important that all three colors in our full-color logo remain legible when used on top of colored backgrounds and/or photography.

Determining which logo to use for best legibility, based on lightness of background

In T2DM Patients having  
**HbA1c > 7.5%** uncontrolled  
on monotherapy

**ALOJA-M/FORTE**

Alogliptin 12.5 mg + Metformin 500mg/1000mg Tab.

**Assured Tight Glycemic Control**

**Dosage**

- **Drug naive Patients with HbA1c > 7.5%**  
Start with ALOJA-M Twice a day
- **Patients on Metformin 500mg BID**  
ALOJA-M Twice a day
- **Patients on Metformin 1000mg BID**  
ALOJA-M Forte Twice a day
- **Patients taking ALOGLIPTIN 25mg OD**  
ALOJA-M Twice a day

Reference: Hosp Pharm. 2013 Jul-Aug; 48(7):580-592. From NESINA package insert

For the use of Registered Medical Practitioner as a Hospital or a Laboratory only.
